

Setup: Rifle, safety on, slung and loaded with 4 rounds. Spare rifle mag on person. Shotgun, bolt closed, safety on, lying on the table with loose ammo next to it. Full magazine loaded in pistol in holster. Hostage Taker head plate set to shooter's strong side.

Course of fire: On the buzzer, draw pistol and shoot Hostage Taker headplate first.

From there you may choose any order to complete the following below. You may shoot any target from anywhere as long as both feet are behind the orange line. Never violate the 180 degree rule.

1. Flip all plates on the dueling tree **twice**. At least one other target must be shot between the first dueling tree hit and the last dueling tree hit. (Flip all to the left and then flip all to the right, with at least one other target mixed in.)
2. Double tap all chest plates with Rifle.
3. Knock down all head plates with pistol.
4. Load shotgun and knock down the green steel.

TO FINISH, make a second hit on the Hostage Taker headplate.

If you run out of rifle rounds you can always finish with pistol.
